

Investment Opportunity in New Mineral Deposits

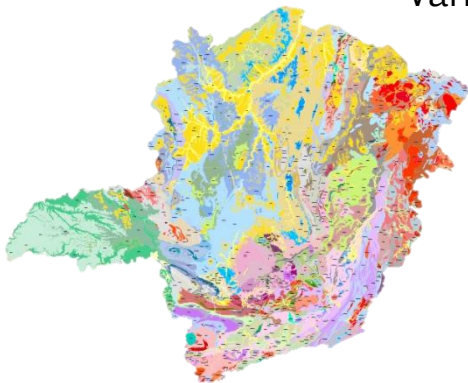

Minas Gerais State, Brazil

- The state with most mines operating in Brazil.
- Home state of Vale and other big mining companies with the largest iron ore deposits after Carajás.
- The state with the largest number of studied mineral deposits.
- Location of the largest phosphate mine in Brazil, of the biggest niobium extraction in the world, and many world class iron and gold mines in the Ferriferous Quadrangle.

Even so, the state still has much mineral deposits unexplored.

Various minerals deposits potential targets, such as:

- Iron
- Gold
- Bauxite
- Manganese
- Phosphate
- Nickel
- Titanium
- Kaolin
- Diamond
- Quartz
- Granite
- Gems

We seek investors interested in Greenfields and Brownfields projects.

We offer consulting in geology, prospecting, Brazilian mineral legislation, mining and environment.
